### EXPLANATORY NOTES

1. The applicant is the person who is authorised to procure radioactive material by Atomic Energy Regulatory Board and will be in charge of the use, storage and responsible for making arrangement for the disposal of the radioactive material.
2. The consignee's copy of the air consignment note is usually carried by the Airline along with the consignment itself and users are advised to arrange collection of the consignment from the airline office on the basis of the dispatch advice/intimation sent by us.
3. For each radioactive product a separate application should be filled. For requirements covering a whole year it is advisable to place a standing order covering the calendar year indicating the activity required and the frequency of supply in the form. For recurring needs of any given product covering periods less than one calendar year a limited order for the period can be placed in order form itself.
4. Indicate the specific activity of activated element wherever applicable
5. Application should be complete in all respects. The code and the name of the product should be invariably specified. Incomplete and incorrect applications are liable to be returned to the applicant for corrections.
6. Every effort will be made to supply the products on the scheduled dates. In exceptional cases we may be constrained to postpone / cancel the supply on account of unforeseen reactor shutdown or due to any unforeseen situation beyond our control.
7. Order for Radiography sources in R/1 form, for labeled Biomolecules in B/1 form and standing order for Radiopharmaceuticals in SA-4 form, for Radiochemicals & Radiopharmaceuticals in A/1 form and Irradiation Services in A2 form.
